# 1 Partner Support Model

Support channels are separated by function below:

**Commercial & Partnership Enquiries:** eCommerce Partnerships Team ([partners@auspost.com.au](mailto:partners@auspost.com.au))  
(Product, agreements, brand, relationship management)

**Technical Support (MyPost Business BYO):** MPB Partner Support team  
([mpbpartnersupport@auspost.com.au](mailto:mpbpartnersupport@auspost.com.au))

**Technical Support (Contract & EES):** Lodgement Support Team ([via our support form](#))

**Escalation:** eCommerce Partnerships team if no response is received within 2 business days.

## 2 Agreements & Production Access

### Required Agreements

Depending on your integration type, the following agreements apply:

- **API Licence, Services & Marketing Agreement** – required for all partners
- **EES Agreement** – required for EES integrations only

Production credentials will only be issued once all applicable agreements have been executed.

### Agreement Renewals

- At renewal, updated agreements must be signed within **30 days** of notification.
- Failure to complete renewal within this timeframe may result in **API access being decommissioned**.

## 3 Partner ID

This is your unique identifier that is required to be included within all your API calls as an eCommerce Partner.

Your partner ID will have been provided to you in the onboarding email.

### What do you need to do?

To implement the Partner ID, you need to include the AUSPOST-PARTNER-ID header and your unique ID within the HTTP header of your API calls. For example:

```
Content-Type: application/json
Accept: application/json
AUSPOST-PARTNER-ID: PLATFORM-1234
Account-Number: 0000123456
Authorization: Basic eW91c191c2VyX25hbWU6cGFzc3dvcmQ=
```

The AUSPOST-PARTNER-ID header is required within all your various calls to Australia Post's APIs.

**For Partners integrating via other Partners, the Partner ID needs to be unique for easy identification of volumes being facilitated by the individual Partner. Please request a new partner ID if another platform is integrating via your platform.**

If you have not received your Partner ID, please contact the eCommerce Partnerships team: [partners@auspost.com.au](mailto:partners@auspost.com.au).

## 4 Requesting Testbed Keys

### 4.1 eParcel & other contract services

#### Testbed Credentials

To obtain testbed credentials, please follow the below steps:

1. Register on the Developer Centre [here](#)
2. Create a support request for testbed credentials be issued [here](#) and follow the below steps:
  - a. Select 3<sup>rd</sup> party software provider
  - b. Enter your Partner ID which is provided to you in your partner onboarding email (or leave blank if you haven't been issued one)
  - c. Under 'Topic', select 'Creating shipments and labels'
  - d. Under 'Enquiry', select 'Set up a new lodgement solution for the first time'
  - e. Under 'Software', select 'Shipping & Tracking API'
  - f. Under 'Description' enter: 'I am a new partner requesting testbed keys for eParcel/MyPost Business at the direction of the eCommerce Partnership team. I have registered an account on the Developer Centre with email address: abc@companyname.com'
  - g. Complete your contact details
  - h. Submit the form

### 4.2 MyPost Business (BYO)

#### Testbed Credentials

To obtain testbed credentials for MyPost Business, please follow the below steps:

1. Register on the Developer Centre [here](#)
2. Email [mpbpartnersupport@auspost.com.au](mailto:mpbpartnersupport@auspost.com.au) and cc [partners@auspost.com.au](mailto:partners@auspost.com.au) advising your Partner ID as well as your email address used to register on the Developer Centre and that you are requesting MPB testbed credentials.
3. If you have not yet been issued a Partner ID, please contact our eCommerce Partnerships team via email: [partners@auspost.com.au](mailto:partners@auspost.com.au)

## 4.3 eCommerce Ecosystem Solution (EES)

### Testbed Credentials

To obtain testbed credentials for EES, please follow the below steps:

1. Register on the Developer Centre [here](#)
2. Email [partners@auspost.com.au](mailto:partners@auspost.com.au) advising your **Partner ID** as well as the email address used to register on the Developer Centre and that you are requesting EES testbed credentials.
3. If you have not yet been issued a Partner ID, please contact our eCommerce Partnerships team via email: [partners@auspost.com.au](mailto:partners@auspost.com.au)

## 5 Product Overview

### 5.1 Parcel Contract Products (eParcel & StarTrack)

Designed for larger merchants typically sending **2,000+ parcels per annum**. Available via Shipping & Tracking APIs.

#### Domestic:

- Parcel Post
- Parcel Post + Signature
- Express Post
- Express Post + Signature
- Metro
- Wine
- Parcel Post Returns
- Express Post Returns

#### International Postal

- International Express
- International Standard

#### International Commercial

- International Commercial

#### StarTrack

- Express
- Premium
- Fixed Price Premium

#### Same Day

- On Demand
- StarTrack Courier

### 5.2 MyPost Business (MPB)

Designed for smaller merchants sending **up to 2,000 parcels per annum**.

#### Domestic

- Parcel Post
- Express Post
- Includes “If it packs, it posts” services

#### International

- International Express
- International Standard

Note: Features such as signature, pickups and Extra Cover differ from Parcel Contract rules. Ensure documentation is reviewed carefully.

### 5.3 eCommerce Ecosystem Solution (EES)

EES is designed for eCommerce Platforms, Marketplaces and some Shipping Platforms. It enables partners to offer a simple, scalable shipping solution to senders while maintaining compliance with Australia Post requirements.

#### How the product works:

- The Australia Post account is held and managed by the Partner
- Senders access the Partner's pre-negotiated "house rates"
- 
- The Partner remains responsible for account compliance and billing management etc.

#### When to use this product:

- Senders are newly established or operating at low shipping volumes such as on C2C Marketplaces
- A simplified onboarding experience is preferred
- Merchants do not require individually negotiated freight rates
- 

As merchant volumes grow, they may transition to their own direct Australia Post account where commercially appropriate. EES uses the MyPost Business product set.

### 5.4 Australia Post Global eCommerce Solutions (APG)

For businesses shipping from global origin points (e.g. ex US, UK, EU, China, Canada). Contact the eCommerce Partnerships team for introductions to the APG team.

## 6 Technical Integration (Parcel Contract)

### 6.1 Parcel Contract Overview

**eParcel:** <https://auspost.com.au/business/shipping/eparcel-contract>

**StarTrack:** <https://startrack.com.au/logistics-and-freight>

**eCommerce Partner Integration Guide** for merchants is available on the Partner Resource Centre.

### 6.2 Getting Started

A getting started guide and tutorials are available for the Shipping & Tracking APIs [here](#). Navigate through the left menu for further information, business rules and further resources including [workflows](#).

### 6.3 Technical Documentation

The documentation for our [Shipping & Tracking APIs](#) is available here.

### 6.4 Technical Contacts

Please direct technical enquiries to our Lodgement Support form via the below link: <https://auspost.com.au/lodgement-techsupport>.

If you do not receive a response in 2 business days, please escalate to [Partners@auspost.com.au](mailto:Partners@auspost.com.au).

### 6.5 Integration Verification & Signoff

Once you have completed the integration with our APIs, and before going live, you are required to send Shipment, Label, and Order files (API payloads etc) for all integrated services.

To do so, you are required to complete and submit the [Technical Validation Form](#) to our Support team for review via the [Integration Support form](#).

If you are planning on generating your own labels / barcodes (as opposed to requesting these from the API) please advise the Support team and they will assist you accordingly.

## 7 Technical Integration (MyPost Business)

### 7.1 MyPost Business Overview

<https://auspost.com.au/business/shipping/mypost-business>

### 7.2 MyPost Business Postage Rates

[https://auspost.com.au/content/dam/auspost\\_corp/media/documents/mypost-business-postage-rates-guide.pdf](https://auspost.com.au/content/dam/auspost_corp/media/documents/mypost-business-postage-rates-guide.pdf)

### 7.3 Technical Documentation

On the Partner Resource Centre, navigate to *MyPost Business Integration Specs and Doc* for further information on integrating MyPost Business. This link includes:

- a) **MyPost Business Integration Guide / technical specifications**
  - Please review these and advise if you have any questions
- b) **MyPost Business Technical Sign off form**
  - Please complete and return this when your integration is ready to be verified
- c) **Test Cases**
  - Please complete all of these cases and provide corresponding labels and API payloads for each test case

### 7.4 Technical contacts

Please direct technical enquiries to our MPB Partner Support team via the email address below:

[mpbpartnersupport@auspost.com.au](mailto:mpbpartnersupport@auspost.com.au)

If you do not receive a response in 2 business days, please escalate to

[Partners@auspost.com.au](mailto:Partners@auspost.com.au).

### 7.5 Integration Verification & Signoff

Once you have completed the integration with our APIs, and before going live with the solution, you are required to provide the Technical Validation Form and test cases as provided with the MyPost Business documents found on the Partner Onboarding Hub in the MPB folder.

Please email [mpbpartnersupport@auspost.com.au](mailto:mpbpartnersupport@auspost.com.au) (copy [partners@auspost.com.au](mailto:partners@auspost.com.au)) with the completed Technical Validation Form, and test cases for our teams to review.

Final approval includes a technical and UX walkthrough with relevant teams.

## 8 Technical Integration (EES)

### 8.1 EES Overview

Refer to the document named **“EES Product Overview”** in the onboarding email shared with you.

### 8.2 EES Postage Rates

As part of the EES offer, you will be “locked” on a MyPost Business Band based on commercial discussions with the Australia Post eCommerce Partnerships team.

As MyPost Business is the product set that powers the EES integration, please check the MyPost Business Rates & Savings guide for more information on the discounts available on the Band offered to you.

### 8.3 Technical Documentation

On the EES Onboarding Hub, navigate to *EES Integration Guide* for further information on integrating EES. This link includes:

- a) **eCommerce Ecosystem Solution (EES) Technical Specifications**
  - Please review these and advise if you have any questions
- b) **MyPost Business API Integration Guide**
  - Please review this as MPB product powers the EES
- c) **Partners Help & Support Guide**
  - SOPs for customer support
- d) **EES Technical Sign off form**
  - Please complete and return this when your integration is ready to be verified
- e) **Test Cases**
  - Please complete all these test cases and provide corresponding labels and API payloads for each test case with the EES Technical Sign Off form.

### 8.4 Technical contacts

Please direct technical enquiries to our Lodgement Support form via the below link:

<https://auspost.com.au/lodgement-techsupport>.

If you do not receive a response in 2 business days, please escalate to

[Partners@auspost.com.au](mailto:Partners@auspost.com.au).

## 8.5 Integration Verification & Signoff

Once you have completed the integration with our APIs, and before going live with the solution, you are required to provide the Technical Validation Form and test cases as provided with the EES documents found on the EES Partner Onboarding Hub.

To do so, you are required to complete and submit the [Technical Validation Form](#) to our Support team for review via the [Integration Support form](#).

Final approval includes a technical and UX walkthrough with relevant teams.

## 8.6 Invoicing & Payments (EES/Charge Accounts)

Partners can manage invoices via **My Business Account (MBA)**.

MBA enables:

- Viewing and downloading tax invoices
- Making payments (Credit Card or Direct Debit)
- Monitoring credit limits
- Accessing pricing statements (PDF or CSV)
- Lodging disputes
- Reviewing transaction history

For billing queries, contact your credit representative listed on your invoice.

## 8.7 Reporting Integration

You will have access to a suite of reports to support transaction reconciliation and financial management of EES.

These reports provide visibility over invoicing and any postage adjustments.

- Standard invoice (\*.csv or \*.pdf)
- Underpaid Postage Report – Outlines transactions where detected dimensions, weight or cubic weight are over the declared dimensions, weight or cubic weight, or incorrect packaging specified at the time of creating the shipment, leading to under payment of postage

## 9 Branding & Marketing

Partners promoting their integration with Australia Post must ensure all external communications accurately reflect the partnership and comply with brand requirements.

### Brand Compliance Obligations

Partners must:

- Comply with the Australia Post Brand Guidelines
- Use approved logos and brand assets only
- Ensure all public facing messaging aligns with the agreed partnership terms
- Obtain Australia Post approval for any co-branding, co-marketing initiatives, or campaign activity prior to launch

These requirements help protect both brands and ensure consistent, accurate representation in market.

### Accessing Brand Assets

Approved brand assets and guidelines are available via the Partner Resource Centre.

## 10 Developer Centre Status Updates

All Partners should subscribe to API status notifications.

We strongly recommend registering a group mailbox or distribution list to ensure operational visibility of:

- Scheduled maintenance
- Service disruptions
- Unplanned outages

Please subscribe to API status updates here: <https://status.developers.auspost.com.au/>
