

eCommerce Partner brand guide

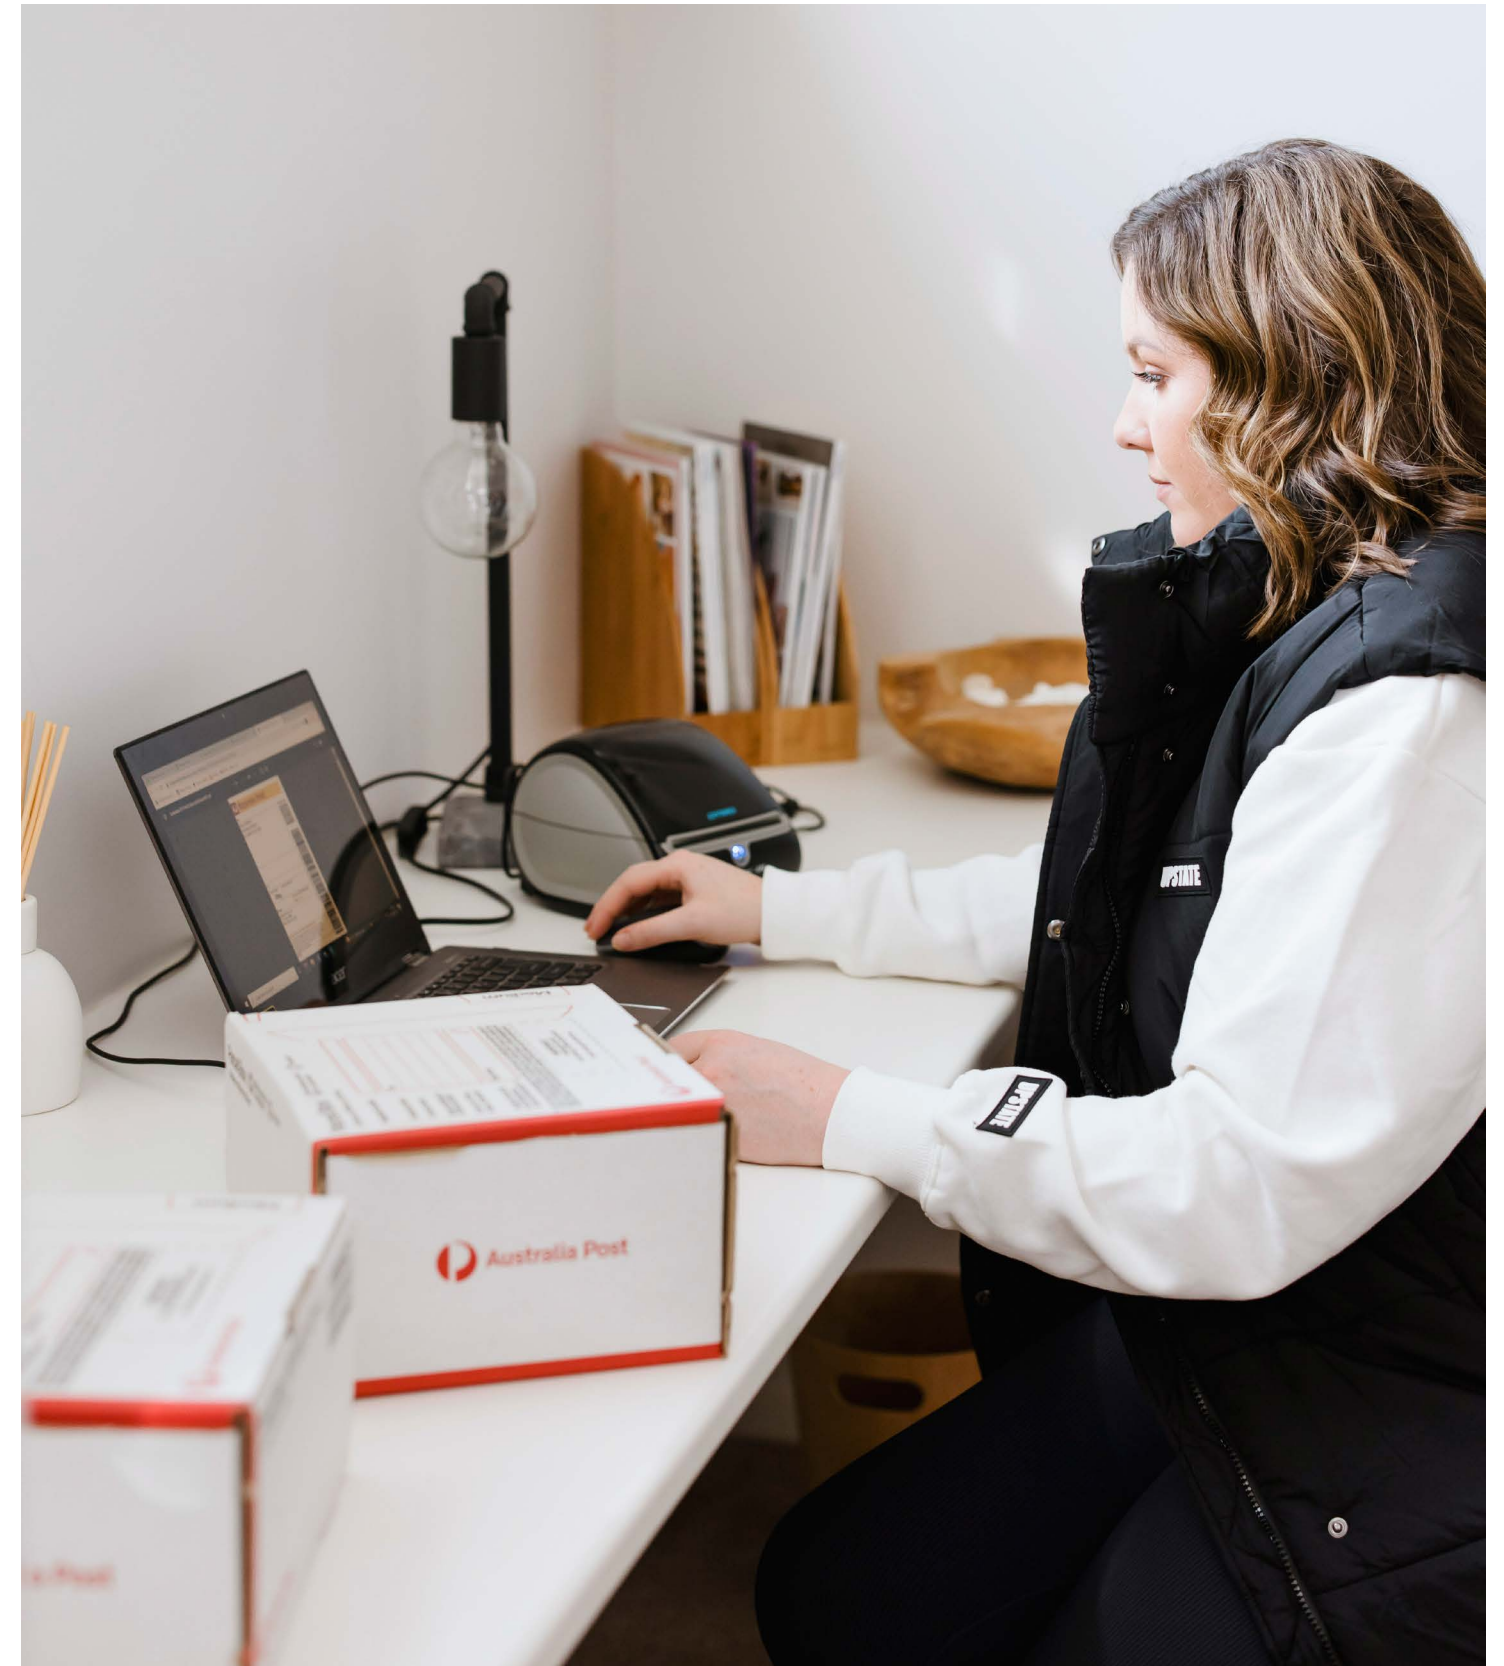

How to apply Australia Post branding

Overview

Welcome to our eCommerce Partner brand integration guidelines.

These guidelines have been designed to help our Partners present the Australia Post brand in market.

The following pages outline how to use the Australia Post visual identity and how to refer to a Partnership, product or service in copy.

Our logo

Guiding principles

Using Australia Post logo and lockups

Using our logos

The Australia Post logo should be used on a white or light background.

Parcel delivery offer lockups

Parcel delivery offer lockups combine our Postal Horn with the wordmark. The wordmark cannot be used on its own.

Identifier icons

Identifier icons are available to differentiate Express Post and StarTrack.

Clear space

Clear space is the distance that needs to remain clear around a logo in application.

The clear space for our logos is equal to 50% the height of the Postal Horn.

Minimum size

When implementing one of our logos into a Partner environment, its size is measured by the pixel width of the Postal Horn. The minimum permitted size is 16px.

Partner websites

Before login

Representing the Australia Post brand before login:

- ✓ Partner can display our Australia Post and/or StarTrack logo.
- ✗ Our parcel delivery offer lockups and icon identifiers aren't displayed within this space.
- ✓ Partner can reference in text Australia Post parcel delivery offers, products and services. Refer to [page 7](#) for product naming conventions.

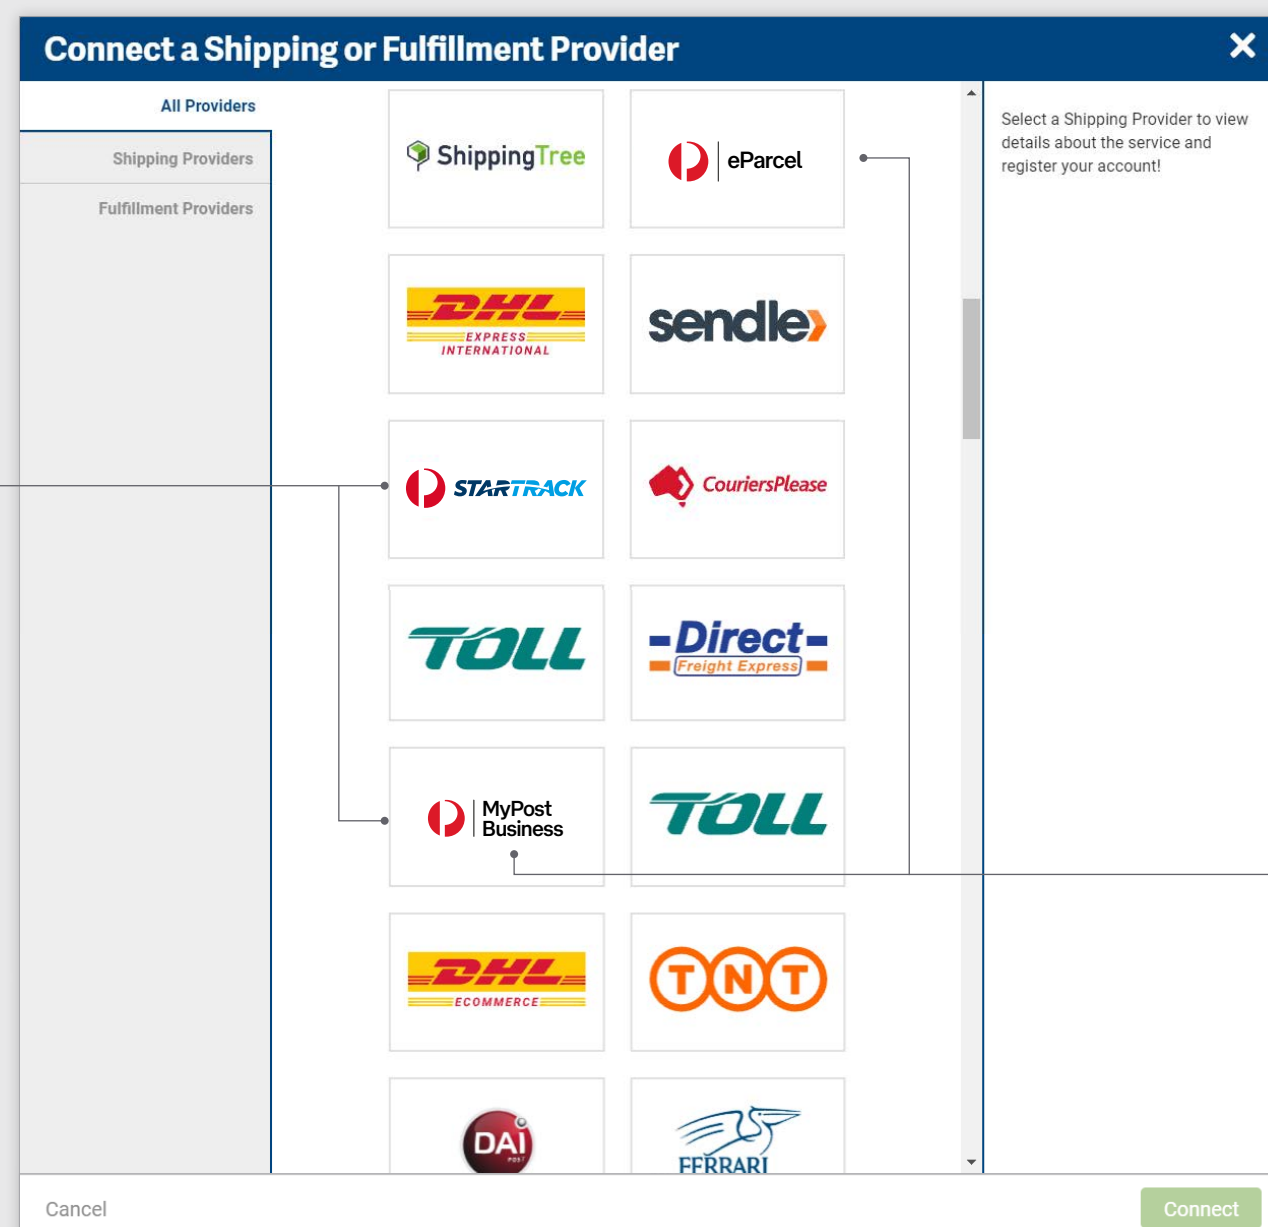

Partner websites

After login

Representing the Australia Post brand after login:

- ✓ Partner can display our Australia Post and/or StarTrack logos.
- ✓ Parcel delivery offer lockups can be used to aid Partners selecting their shipping or fulfillment provider.
- ✓ In environments where lockups aren't used, Partner can reference in text the Australia Post parcel delivery offer using the full description.
- ✓ Postal Horns would ideally be the same size across the logos and lockups.

Postal Horns should ideally be the same size.

AP Postal Horn and parcel delivery offer lockups used for these services

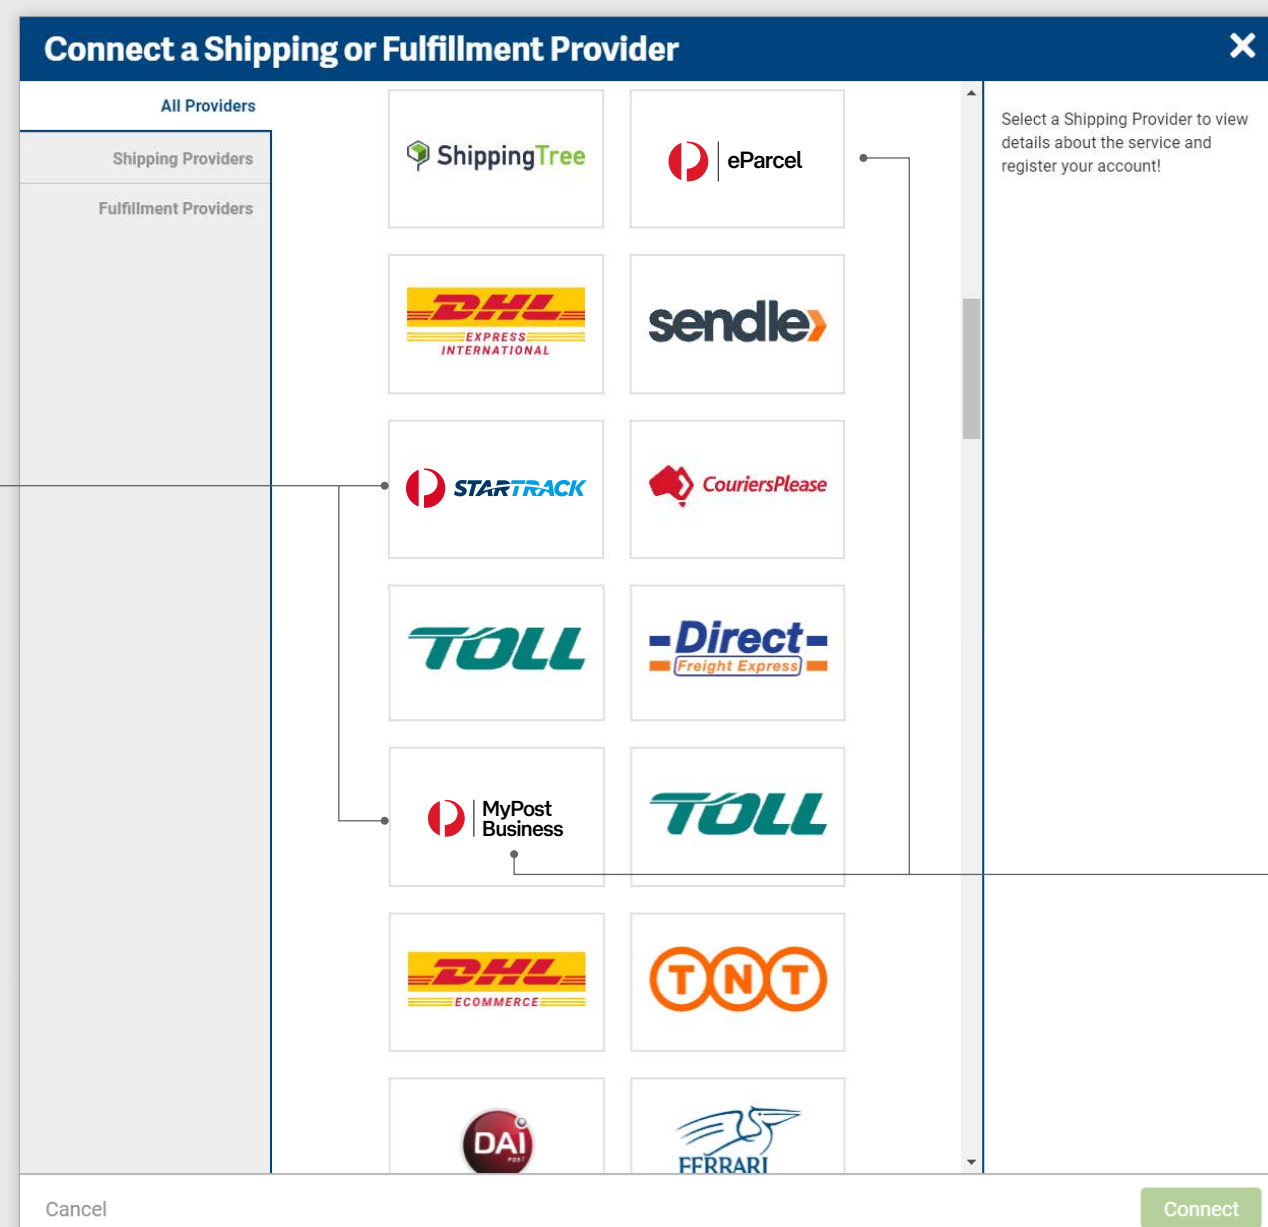

Partner websites

After login

Representing the Australia Post brand after login:

- ✓ Partner can display our Australia Post and/or StarTrack logos.
- ✓ Parcel delivery offer lockups can be used to aid Partners selecting their shipping or fulfillment provider.
- ✓ In environments where lockups aren't used, Partner can reference in text the Australia Post parcel delivery offer using the full description.
- ✓ Postal Horns would ideally be the same size across the logos and lockups.

Postal Horns should ideally be the same size.

Partner platforms

After login

Representing Australia Post products and services across platforms:

- ✓ Partner can reference in text Australia Post parcel delivery offers, products and services. Refer to [page 7](#) for product naming conventions.
- ✓ Partner can display the icon identifiers to differentiate Express Post and StarTrack.

Note: this example uses the preferred naming convention

Alternative naming application 1

 **MyPost Business: Express**
\$XX.XX • X days

 **MyPost Business: Standard**
\$XX.XX • X days

Alternative naming application 2

 **MyPost Business: Exp**
\$XX.XX • X days

 **MyPost Business: Std**
\$XX.XX • X days

Alternative naming application 3

 **MyPost Business: Express Post**
\$XX.XX • X days

 **MyPost Business: Parcel Post**
\$XX.XX • X days

Note: this is dependent of the platform catering for 2 lines

Partner platform

Product naming conventions

We use the following naming convention to differentiate between our parcel delivery offers and products on Partner platforms.

Alternative product names are available to accommodate restrictions on name length.

- ✓ Include the Australia Post parcel delivery offer if multiple offers are presented on the same screen.
- ✓ The Australia Post parcel delivery offer and the StarTrack brand name can also appear as heading or attached to the product name.

Identifier icon

We use an identifier icon to visually differentiate Express Post and StarTrack.

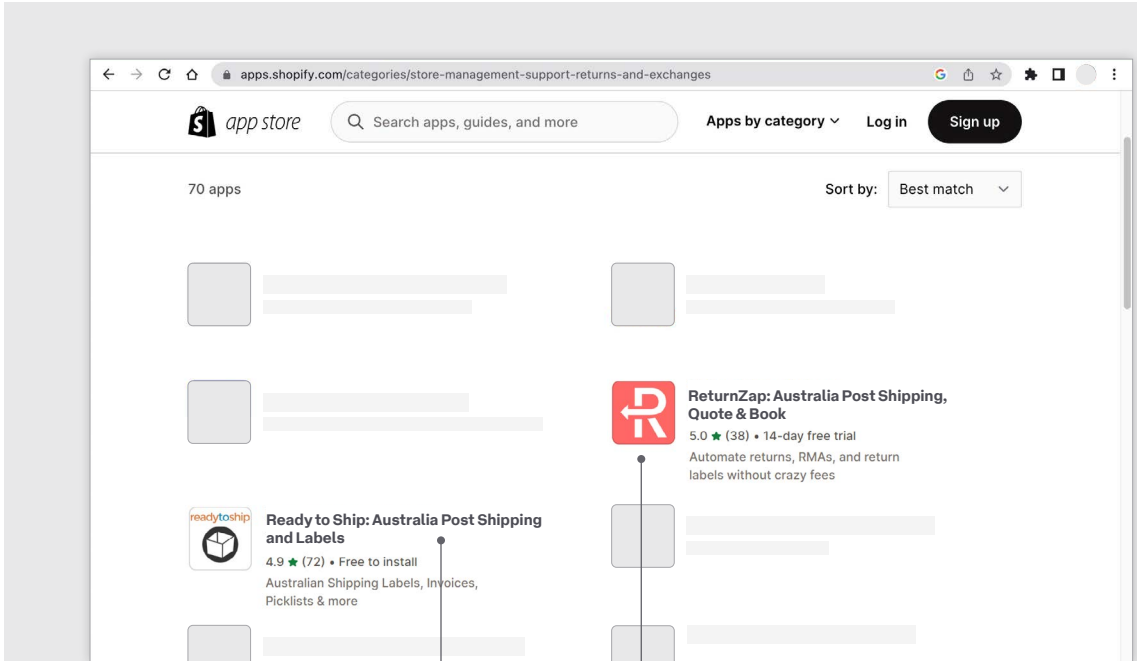

To obtain product naming conventions for additional products please contact partners@auspost.com.au

Partner apps

Integrated services

- ✓ If the product integrates Australia Post services exclusively, Partners are permitted to refer to Australia Post in the app name if they wish.
- ✗ If the product integrates services from a range of logistic providers – including Australia Post and our sub-brands – reference to Australia Post is **NOT** permitted in the product name.
- ✗ The Australia Post logo isn’t used to represent Partner apps (e.g. our postal horn isn’t used in the app icon/tile).
- ✓ Partners should apply a consistent application across all services.

App name uses product naming conventions and references Australia Post.

App uses Partner’s branding. The Australia Post logo or Postal Horn is **NOT** used.
